

Baby Yoda

I chose to put baby Yoda on my home page to add personality and grab instant attention, because he is so cute! Then you will read the text and want to read more!

Styling

The main color is green, because it fits with baby Yoda. The background is black because I like dark mode and it fits very well with the green.

I didn't use any other color to keep it simple and not overwhelming to look at.

Motivation

When I first started to learn programming I really liked the idea that my imagination can come to life.

I can use my creativity and my problem solving skills to solve real world problems just by coding.
